SECURE.
SCALE.
SUCCEED.

CyPro

We take care of cyber security for high-growth companies, at every stage of their journey.

We do this by crafting security capabilities that are perfect for your current size and ready to scale effortlessly in line with your future growth.

This gives peace of mind to your leadership team and **enables you to win increasingly bigger clients.**

75% of all cyber attacks globally are targeting small to medium sized businesses

Small to medium sized businesses (SMBs) are now the most targeted for cyber attacks across the UK, with 60% of victims going out of business within six months.

Criminals are pivoting to SMBs as they take less effort to attack, impacts are higher and they don't draw attention from the media or law enforcement.

Defending against these attacks is uniquely challenging for smaller organisations due to a lack of bandwidth, skills and resources. The existing cyber security market has tried to apply enterprise level security to SMBs which results in misaligned security and business objectives, consultants' deliverables becoming 'shelf-ware' and wasted client budgets.

A different approach to security is required - **CyPro** - specialists in taking care of the cyber security needs of SMBs.

We enable high-growth companies to rapidly reduce their cyber risk by crafting security capabilities that are perfect for your current size and ready to scale effortlessly in line with your future growth.

SERVICES

CyPro Group

CyPro Build & Protect

Establish security controls that are appropriately sized for a growing business.

- Strategic to deep technical
- Projects based delivery
- Fixed price

Examples;

- ✓ Programme Delivery
- ✓ Policies & StandardsTarget Operating Model
- ✓ Audits & Maturity Assessments
- ✓ Incident Response Prep
- ✓ Disaster Recovery Planning
- ✓ Cyber Awareness Training
- ✓ Certification Readiness

CyPro Run & Sustain

Achieve ongoing peace of mind via a scalable and complete cyber security managed service.

- Technical deployments
- Projects & service delivery
- Retained (monthly)

Examples;

- ✓ vCISO service
- ✓ Endpoint Protection
- ✓ SIEM (Security Incident & Event Monitoring)
- ✓ Access Mgmt tooling
- ✓ Data Loss Prevention
- ✓ Penetration Testing
- ✓ Security Alerting

CyPro Talent & Transition

Find exceptional people when the time comes to build your own in-house security function.

- Interim and permanent staff
- Role definition to selection
- Commission based

Examples;

- ✓ Interim CISOs
- ✓ Data Protection Officer(DPO)
- ✓ SecOps Manager
- ✓ IDAM Specialist
- ✓ Auditor / compliance lead
- ✓ Security Architect
- ✓ SOC Manager
- ✓ Cloud Security Expert

CYBER-AS-A-SERVICE

Risk Remediation Tasks

We progress and manage all security risk remediation tasks, e.g. implement 2FA, configuring a password manager or table-top exercising a new incident response plan.

Incident Management

You have a CISO, InfoSec Manager and SecOps Lead, all with hands-on incident response experience. We also run an annual incident response exercise to keep you prepared.

Cyber Assurance & Testing

Each year we will conduct; 1) a cyber maturity assessment measuring your strategic progress and identifying areas for improvement, and; 2) a penetration test of core IT infrastructure/applications.

Security Awareness

We provide innovative training, impactful communications (such as our entertaining Cyber Bulletin) and engaging cyber security exercises to raise awareness amongst staff and execs.

Secure Software Development Lifecycle

We help you implement vulnerability scanning and security testing in the software development lifecycle ensuring that historic and newly developed code is secure and resilient.

Security Operations

We monitor your network and security systems (e.g. AWS and GCP) for suspicious activity, investigate incidents and respond to threats. We continuously identify and mitigate vulnerabilities, and enforce new security policies.

CLIENTS

Reclaim Capacity
You don't have the time or expertise to implement and maintain security solutions. We do it for you.

Access Experts on Demand
Senior and experienced experts only, who can be on hand immediately when you need them.

Uncover The Priorities
Understand the fastest route to maximum risk reduction for your business.

Attain Peace of Mind
Fully managed service with professional reporting that keeps your exec informed and reassured.

Implement Proportionate Security
Don't pay for controls you don't need. We provide clarity on how much security is required at different stages of your growth.

Use Compliance to Your Advantage
Use your regulatory obligations to meet client due diligence requirements, helping you generate more business.

> "CyPro rapidly enhanced our cyber security posture, helping us to reduce risk and confidently meet customer requirements. What sets them apart is their approach, embodying an astute blend of professionalism and pragmatism, always acknowledging our imperative for agility and adaptability."

Ian Leadbetter (Founder) - Ruler Analytics

> "From the early days, Cypro has played a key role in strengthening our cybersecurity. They've tailored their program to offer exceptional value as we've grown more sophisticated, adapting seamlessly to align with our size and resources. We are proud of our partnership with them!"

Scott Switzer (CTO) - Ozone
